

SAMIHA GAFFAR

Orlando, FL | (516) 325-0057 | samihagaffar@gmail.com | LinkedIn | Portfolio

PROFESSIONAL PROFILE

Computer Science graduate with Bachelor's and Master's degrees and experience analyzing workflows, documenting requirements, supporting system implementation, and collaborating with technical teams. Skilled in requirements gathering, process analysis, user stories, technical documentation, Agile delivery, and translating business needs into actionable technical requirements.

CORE COMPETENCIES

Business Analysis: Requirements Gathering • Process Analysis • Workflow Documentation • Business Requirements • User Stories • Process Improvement

Agile: Agile • Scrum • Sprint Planning • Jira • SDLC • Cross-Functional Collaboration

Technical: SQL • Systems Analysis • Database Design • Technical Documentation • Quality Assurance

Tools: Jira • Confluence • Tableau • ServiceNow • Epic Beaker • Firebase

ANALYSIS & PROJECT EXPERIENCE

Project Lead | Dine on Demand

iOS Restaurant Reservation & Food Ordering Platform | Jan 2022 – May 2022

- Led a three-person team through requirements definition, workflow planning, design, and delivery of an iOS restaurant reservation and food ordering application.
- Gathered user feedback and stakeholder input to identify pain points, define requirements, and prioritize features.
- Authored user stories, managed the Jira backlog, and coordinated work across technical team members.
- Created wireframes and process flows to communicate requirements and presented solutions to stakeholders.

Project Lead | Auto Insurance App

Personalized Auto Insurance Recommendation Platform | Oct 2021 – Dec 2021

- Led a three-person Agile team in analyzing requirements and developing a personalized auto insurance recommendation platform.
- Facilitated sprint planning, managed the Jira backlog, and coordinated development tasks.
- Conducted competitor analysis and evaluated requirements to prioritize initiatives based on customer value and project scope.
- Created wireframes and communicated functional requirements and product decisions throughout development.

Product Team Member | Connect NYC

Student Engagement Platform | Sep 2020 – Dec 2020

- Contributed to roadmap planning and translated business needs into epics and user stories.
- Created technical documentation including workflows, database schemas, and user manuals.
- Participated in Agile planning sessions to refine requirements and support sprint execution.

PROFESSIONAL EXPERIENCE

NYU Langone Health | Laboratory Assistant | Mineola, NY | May 2025 – Sep 2025

- Supported Epic Beaker implementation through workflow documentation, system adoption, and quality assurance.
- Analyzed laboratory workflows, collaborated with staff to identify operational issues, and supported process improvements.
- Maintained data accuracy and developed documentation for onboarding and standardized laboratory procedures.

New York Institute of Technology | Graduate Teaching Assistant | Old Westbury, NY | Sep 2021 – May 2022

- Mentored graduate students in Software Engineering, Theory of Computation, and Discrete Structures.
- Translated complex technical concepts into clear guidance and supported faculty with course administration.

The Coder School | Coding Coach | Syosset, NY | Sep 2019 – Mar 2021

- Taught Java, Python, SQL, and Scratch through personalized instruction for students ages 8–18.
- Guided students through software projects while developing analytical and problem-solving skills.

EDUCATION

New York Institute of Technology

M.S. in Computer Science | 2022 | GPA: 3.83 | Summa Cum Laude

B.S. in Computer Science | 2021 | GPA: 3.68 | Magna Cum Laude
